Senior Flutter Developer with 5+ years of experience building scalable cross-platform mobile applications for Android, iOS, and Desktop. Experienced in developing production-grade applications using Flutter, Dart, Firebase, and REST APIs. Proven track record of delivering multiple apps published on the Play Store and App Store across domains, including fintech, logistics, food delivery, and business management systems. Skilled in state management using BLoC and GetX, API integration, QR scanning, and building high-performance, user-friendly mobile applications.

Skills

Flutter & Dart Development

Cross-platform Mobile Development (Android / iOS)

REST API Integration

Firebase Services (Authentication, Firestore, Push Notifications)

State Management (BLoC, GetX)

QR Code & Barcode Scanning

Payment Gateway Integration

App Performance Optimization

Play Store & App Store Deployment

Git Version Control (GitHub, Bitbucket, Azure)

Android Development (Kotlin)

WORK HISTORY

BDO India LLP

08/2022 – Present

Sr. Executive (Flutter Developer)

- Developing scalable cross-platform mobile applications using Flutter and Dart.
- Implementing REST API integrations and Firebase services for real-time data handling.
- Building secure financial and client management applications. Developing QR code scanning and verification features for e-invoice and e-way bill validation.
- Collaborating with backend teams to design and implement efficient API communication.
- Maintaining application performance, debugging issues, and improving app stability.
- Publishing and maintaining applications on the Play Store and App Store.

MSP IT Concepts

06/2020 – 08/2022

Jr. Android Developer (Flutter Developer)

- Developed mobile applications using Flutter and Android technologies.
- Implemented REST APIs and integrated backend services for dynamic data handling.
- Built UI components and optimized application performance.
- Worked on food ordering and delivery applications with real-time order management.
- Participated in debugging, testing, and improving application stability.
- Contributed to publishing applications on the Google Play Store.

EDUCATIONAL BACKGROUND

Master of Computer Application

B. H. GARDI COLLEGE OF ENGINEERING & TECHNOLOGY
8.99 CPI

2020 – 2022
Rajkot

Bachelor of Computer Application

SHASTRI SWAMI SHREE DHARMAJIVANDASJI INSTITUTE OF INFORMATION TECHNOLOGY
JUNAGADH
9 CGPA

2017 – 2020

Technologies & Tools

Mobile Development

Flutter, Android

Programming Languages

Dart, Kotlin

Version Control

GitHub, Bitbucket, Azure DevOps, SVN

State Management

MVC, BLoC, GetX

Backend Service

Firebase, RestAPI (http, dio)

Development Tools

Android Studio

PROJECTS

Private Client service (Flutter) (On Going)

Application used for managing financial information of private clients including credit cards, bank accounts, loans, fixed deposits, and equities. Implemented secure data management and user-friendly dashboard for financial tracking.

Tax Calendar (Flutter)

Task management application designed to track tax-related deadlines and reminders. Implemented calendar-based scheduling and notification system for improved task management.

BVMS (Flutter)

Application developed for verifying e-invoice and e-way bill data using QR code scanning technology. Integrated barcode scanning and API validation for accurate data verification.

Multi-Restaurant (Flutter)

Developed a complete food ordering platform with features including restaurant listing, menu browsing, order placement, and order tracking. Integrated REST APIs and push notifications.

Delivery Boy For Multi-Restaurant (Flutter)

Delivery management application for delivery partners to manage assigned orders, update delivery status, and track routes.

ManagerApp For Multi-Restaurants (Flutter)

Admin application for restaurant managers to monitor orders, manage menus, and track restaurant operations in real time.

Sail Shipping Logistics Services (Flutter - Desktop)

A desktop application used for logistics management and barcode scanning for shipping operations and tracking shipments.

SMSI Supervision Plus (Flutter - iOS)

Maintenance management system application used to monitor service operations, manage maintenance tasks, and track performance metrics.

FinAccHub (Android)

Stock management application for tracking inventory, managing product details, and maintaining stock records.

Kesh Go (Android)

Grocery delivery mobile application allowing customers to order groceries online with real-time delivery tracking and product browsing.

Cafe Balmano (Android)

Food ordering application for restaurant customers with menu browsing, order placement, and order tracking functionality.
